	X2- STATEMENT				
Z- SCENARIO					

* CLS and Monolith stat panels have model number 1, 2 or 3 following the "S". For Example, CS2HK712 is CLS 2 Stator 1996 November. 700 series indicates that it is a replacement or service stat. It is the 12th service stat for this month and this model.

** Pre-1988 models (like SEQUEL 1) use a different S/N coding, with 7 digits, like 8803173 or 8812023. S/N seems to then be only the manufacturing date, coded yymm###, with no built-in model identification.
