**Steel Top Premium Set**

Only the best materials are used for Enginetechn piston ring sets. At Enginetechn, their top priority is ensuring the quality of their products. They conduct quality assurance testing on all of our products before they are sold to customers.

**Features & Benefits:**

- Enginetechn rings are produced in OE manufacturing facilities.
- Their compression rings are made from the highest quality gray iron, ductile iron and high strength steel.
- Barrel face, taper face, positive twist, reverse twist and Napier face designs (among others) are used where required.
- Numerous ring face coatings are available depending on the application. Enginetechn face coatings include plasma moly, chrome, gas nitrided & PVD.
- Enginetechn oil ring assemblies include designs such as SS-50, PC-98, Wire Latch & Flex Vent. Their oil ring expanders are designed for ease of installation to help prevent overlap during assembly.

**Why Choose Enginetechn Piston Rings?****Piston Ring Sets - Enginetechn**

*Attention California Customers - Warning: This product may expose you to chemicals including lead and nickel, which are known to the State of California to cause cancer and birth defects or other reproductive harm.
