Installing AutoCAD LT 2000 under Windows 8.1

Thought I'd re-post and update this because it worked for me. It was buried pretty deep and I really had to dig to find something that worked. Lots-o-posts about stuff that didn't. Hope this is helpful - it was much appreciated by me.

1. Copy the contents of the AutoCAD LT 2000 CD to a folder on your hard drive. It can be deleted after completing the installation.
2. Download and extract setup32.exe from. http://toastytech.com/files/Is3Engine.zip
3. Copy setup32.exe into the folder where you copied the AutoCAD LT 2000 CD.
4. Right click on setup32.exe. Go to the compatibility tab and select Windows 95 or 98 -> Apply and OK to exit.
5. Run setup32.exe and install to C:\AutoCAD LT 2000.
6. After 98% complete the installer complained about not being able to create AutoCAD LT 2000 - ignore this and finish.
7. Restart the computer after the install completes.
8. Launch the app and it will report a .dll was not found. Find and copy the file from your CD folder into C:\AutoCAD LT 2000.
9. Launch again and it will report another missing .dll - find and copy as before.
10. This will continue for about a half dozen .dll files until the launch finally succeeds.
11. You can right click on the icon and pin it to the task bar if you want.
