** GVM = Gross Vehicle Mass. GVM includes the driver, passengers, full fuel tank and luggage.

Tare mass = unladen mass of vehicle and 10 litres of fuel, excludes tray body for Cab Chassis vehicles.

△ Including optional tray.

∞ Figures have been calculated in accordance with ADR81/02 (combined fuel consumption data). Actual fuel consumption will vary depending on driving conditions, driver behaviour, the condition of your vehicle and the accessories fitted.

† Towing capacity is subject to towbar/towball capacity. The capacity may be reduced if a non genuine Nissan towbar is fitted. The permitted download is directly related to the laden mass of vehicle. The maximum towball download is 300kg (4WD models).

~ The fitment of front protection systems and accessories having a combined weight in excess of 55 kgs will require a Positive Bonnet Restraint System & Nissan H/D front suspension springs.

^ iPod is a registered trade mark of Apple Inc.

≠ Leather accented feature and upholstery may contain synthetic material.

* Applies to the first 12x10,000kms scheduled service intervals for up to 6 years/120,000kms (whichever occurs first). Some exclusions apply. Ask your Nissan Dealer or visit nissan.com.au/cpctcs for full terms and conditions.

If the loaded vehicle's rear mass is reduced as shown in the tables, the towball download can be increased correspondingly. Accordingly, if the laden mass is 180kg less than the GVM** a towball download of 200kg is approved (2WD). Different trailer types and different trailer manufacturers have varying towball downloads. The customer will need to contact the trailer manufacturer for information as to the download. Nissan is not able to make any recommendation on the use or suitability of load-levelling or weight distribution devices to be fitted to the vehicle. Customers should contact the manufacturers of these devices for further information.
